

Powering Global Pharmaceutical Expansion in Mexico

Mexico's pharmaceutical sector is rapidly becoming a key nearshoring destination for global companies looking to expand research, manufacturing, and distribution. But tapping into this growing market requires more than just strategic planning—it demands experienced leadership.

The **pharmaceutical industry** (Statista) in Mexico is projected to continue its expansion, thanks to its strategic location and access to the U.S. market. Many companies from the U.S., Canada, and Europe are turning to Mexico for its cost-efficient manufacturing and strong regulatory framework. However, to maximise this opportunity, companies need leadership that understands both R&D and regulatory compliance.

Executives who have a firm grasp on the regulatory landscape in Mexico can help ensure compliance, accelerate clinical trials, and navigate the complexities of nearshoring production. Leaders in R&D and supply chain management are particularly in demand, as they can drive innovation while optimising operations.

TFT Group helps pharmaceutical companies find the senior executives who can lead research and development, ensure regulatory alignment, and manage complex supply chains in Mexico's competitive market.
